Release Date: October 27, 2016

Lake Champlain Basin Program Announcement

Request for Proposals

Best Management Practices for Pollution Reduction: Implementation and Planning Grants

The Lake Champlain Basin Program (LCBP) and New England Interstate Water Pollution Control Commission (NEIWPCC) are pleased to announce a Request for Proposals (RFP) for projects to develop and install large Best Management Practices for pollution reduction in the US-portion of the Lake Champlain watershed, and for projects to provide planning and prioritization for future on-the-ground interventions. Eligible projects for installation of BMPs might include innovative tasks for shoreline stabilization, green infrastructure project implementation, stormwater management projects, combined sewer overflow reductions, or the purchase of equipment to be shared among entities. Eligible projects for planning and prioritization of interventions might include innovative green infrastructure planning at a municipal level, combined sewer reduction strategies, or watershed scale assessments and prioritizations. Up to $490,000 is available for supporting projects from this RFP. Projects for installation of BMPs should be scoped for $50,000 to $125,000; projects for planning and prioritization should be scoped to a budget under $50,000.

This work is applicable to Chapter 4 of the LCBP’s long-term management plan - Opportunities for Action: An Evolving Plan for the Future of the Lake Champlain Basin. This project is supported by funds awarded to the New England Interstate Water Pollution Control Commission (NEIWPCC) by the US Environmental Protection Agency (US EPA) and the Great Lakes Fishery Commission (GLFC) in support of the Lake Champlain Basin Program.

This Request for Proposals is available on the Lake Champlain Basin Program website at www.lcbp.org/grants. To receive a copy of the RFP via U.S. Postal Service, contact the Lake Champlain Basin Program office at (802) 372-3213 or toll free at (800) 468-LCBP in New York and Vermont.

To facilitate the review process, applicants must submit proposals in electronic format ONLY. Please see the RFP and the attached proposal format information for complete details.

DEADLINE NOTICE:

Electronic versions (no facsimiles or hardcopies will be accepted) of proposals must be RECEIVED at grants@lcbp.org by 4:30pm EST on: January 5th, 2017

LATE OR INCOMPLETE PROPOSALS WILL NOT BE CONSIDERED.
Successful applicants will be notified by late February 2017. Although it reserves the right to make no awards, LCBP anticipates granting multiple awards from this RFP.

Lake Champlain Basin Program Announcement

Request for Proposals

Best Management Practices for Pollution Reduction: Implementation and Planning Grants

0. Overview

Congress designated Lake Champlain as a resource of national significance with the Lake Champlain Special Designation Act of 1990. The Special Designation Act also established the Lake Champlain Basin Program (LCBP) and authorized it to receive direct support from U.S. EPA under the Clean Water Act. The LCBP works in partnership with government agencies from New York, Vermont, and Québec, private organizations, local communities, and individuals to coordinate and fund efforts that benefit the Lake Champlain Basin’s water quality, fisheries, wetlands, wildlife, recreation, and cultural resources. These efforts are guided by the comprehensive management plan Opportunities for Action: An Evolving Plan for the Future of the Lake Champlain Basin.

Since 1992, the New England Interstate Water Pollution Control Commission (NEIWPCC) has served as the primary program administrator of LCBP at the request of the LCBP’s Steering Committee, and administers the program’s personnel and finances. NEIWPCC is a congressionally authorized not-for-profit interstate organization whose membership includes all six New England states and New York State and whose mission is to help its member states to realize their individual and collective clean water program goals.

I. Background

LCBP has seen an increasing demand from municipalities, watershed organizations, and other groups to make funds available to support implementation of Best Management Practices (BMPs) on sites that require larger interventions than are supported through typical LCBP annual implementation grants. In addition, there continues to be a need for support for these groups to develop prioritization plans within their respective watersheds of interest, or for planning and engineering design purposes to bring a project up to “shovel-ready” status. This RFP seeks to fund projects that require $50,000-125,000 of support from LCBP to install an intervention to reduce pollution, as well as to fund municipalities, watershed organizations, and other groups that require funding to develop a list of planned projects or prepare projects to be “shovel-ready” for future funding opportunities.
II. Project Tasks and Deliverables

The Lake Champlain Basin Program seeks proposals for two categories of projects: **Category A** projects will require funds to install large-scale BMPs that will reduce pollution into Lake Champlain or its tributaries. Outputs of projects in this category will be the installation of a BMP or series of BMPs. Anticipated outcomes should be identifiable pollution reductions in that subwatershed. Estimates of pollution reductions post-installation should be provided for the anticipated lifespan of the BMP. These projects should be scaled for LCBP support ranging from $50,000-$125,000. **Category B** projects will request less than $50,000 in funding support to develop engineering plans for future BMP projects, or planning and prioritization grants that will assist eligible organizations in development of plans to prioritize or install BMPs in their watersheds of interest to optimize pollution reductions for future implementation opportunities. Examples of outputs from projects in Category B would be engineered design plans for BMP(s) or a prioritized list of projects the applicant can use for future implementation opportunities.

Anticipated tasks in Category A will include the following elements:

1. Identification of a specific site or sites on which the BMP or series of BMPs will be installed.

2. A timeline detailing the unique elements required to complete installation of the BMP(s), including appropriate permits, construction timeframes, and reporting to LCBP.

3. Estimate of pollution reduction for the BMP or series of BMPs for the anticipated lifespan of the practices.

4. A maintenance plan for the BMPs that will be in place once the practices are installed (beyond the scope of the LCBP award), including identification of the organization that will be assuming maintenance responsibilities (if different than applicant, a letter of commitment from said organization should be provided with the application).

Anticipated tasks in Category B will include the following elements:

1. Identification of the watershed, subwatershed, or geographic area in which the planning grant will be focused (this also could include the boundaries of a municipality). If the project is for engineered design, provide specific location and description of the site of interest, elements required to complete installation of the design(s), including appropriate permits, and the issues to be addressed when the pollution reduction practice is installed.

2. Brief description of the land uses that will be addressed in the project (e.g. urban, suburban, agriculture, forested lands)
III. Summary of Other Requirements for the Selected Proposal

The selected applicant will be required to complete the following additional tasks:

1. Following initial notification of the award, a workplan must be approved by the LCBP before a contract agreement can be executed and the work begun. The workplan will detail the logistical elements of the project, including deliverables and project timeline. Information about the LCBP grant process, workplan development guidelines, and reporting requirements can be found on the LCBP website at: http://www.lcbp.org/about-us/grants-rfps/grant-toolkit/. The successful applicant will enter into a contract with NEIWPCC in order to complete the work and will be compensated based on the completion of workplan deliverables.

2. Once the grant agreement has been executed, the contractor must develop a Quality Assurance Project Plan (QAPP) to be approved by the LCBP and the US EPA before the beginning of any data collection or secondary data analyses. More information about LCBP Quality Assurance Plans can be found at: http://www.lcbp.org/about-us/grants-rfps/grant-toolkit/qapp/. The project timeline should be scheduled with an expected QAPP approval date no sooner than 6 weeks following contract execution. No primary or secondary data may be collected or analyzed with LCBP funding prior to QAPP approval.

3. The successful applicant will prepare brief quarterly reports documenting progress on each objective and task in the project (see attached Proposal Format Requirements). A final report fully documenting the project’s results will be required at project completion.

4. When approved, the final report will be edited for content and style in consultation with the successful respondent and may be published as part of the Lake Champlain Basin Program’s Technical Report Series, located here: http://www.lcbp.org/media-center/publications-library/technical-reports/. Some content of this report may also be used for future LCBP public outreach materials.

5. The successful applicant will complete the project according to the following schedule*:

<table>
<thead>
<tr>
<th>Task</th>
<th>Date/Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proposals Due to LCBP</td>
<td>4:30 PM EST, January 5th, 2017</td>
</tr>
<tr>
<td>Applicants Notified of Funding Decisions</td>
<td>Late February</td>
</tr>
<tr>
<td>Detailed Project Workplan Due</td>
<td>Late March</td>
</tr>
<tr>
<td>Project Start Date</td>
<td>May, 2017</td>
</tr>
<tr>
<td>Project Deliverables and Final Report Due</td>
<td>March 30, 2018</td>
</tr>
</tbody>
</table>

*Schedule is subject to change.
6. All materials and work products, regardless of physical form or characteristics, produced as a result of this project shall be made available to LCBP, NEIWPCC, EPA and the GLFC in a suitable file format. LCBP, NEIWPCC, EPA and the GLFC shall have an unrestricted right to use any materials, software, maps, studies, reports, and other products or data generated using assistance funds or specified to be delivered. The contractor shall not obtain, attempt to obtain, or file for a patent, copyright, trademark or any other interest in any such materials, or work products without the expressed, written consent of LCBP and NEIWPCC, and subject to any other approvals required by state or federal law. Reports and other deliverables will credit LCBP, NEIWPCC, EPA, and the GLFC as funding partners for any work completed under the project contract.

7. GIS data produced under this project must adhere to the requirements of EPA’s National Geospatial Data Policy (see http://www.epa.gov/geospatial/docs/National_Geospatial_Data_Policy.pdf). Specifically, the selected contractor must provide documentation for all produced data, including source information for each digital data layer and specific information about the data layer itself. GIS data produced under this project will be submitted to NEIWPCC as a deliverable.

8. If this project is funded through a U.S. EPA Assistance Agreement with NEIWPCC, NEIWPCC cannot use these funds to support a survey without completion of an Information Collection Request (ICR) describing the survey. The ICR must be submitted to the U.S. EPA Office of Management and Budget (OMB) for review and approval. This is an extensive process that can take several months to complete. A survey is defined as the collection of identical information from ten or more non-Federal respondents within a 12-month period. OMB approval must be received before any survey activities supported by NEIWPCC funds can begin.

9. NEIWPCC requires its contractors to maintain workers compensation and liability insurance. More details will be provided to the successful applicant at the time of contracting.

IV. Eligibility

Eligible organizations include colleges, universities, nonprofit organizations, for-profit companies, and non-federal government agencies. The selected contractor will be responsible for the completion of all project tasks. Individuals and representatives from organizations that participated in the development or review of this RFP and its contents are ineligible to apply.

One organization may submit a proposal as the primary applicant for each of the two categories described in this RFP. The applicant should submit a separate proposal for each category; the appropriate category should be clearly identified on the title page of the proposal. Proposals to one category should not rely on support from the other category to be successful.
V. Proposal Evaluation and Selection Criteria

Proposals received in response to this RFP will undergo an external peer review, and will be judged according to the following criteria:

Category A projects:

1. Demonstrated need for this project in the watershed in which it will be installed (e.g. site identified as high priority in a management plan). Describe, if applicable, how the project leverages other work partnerships and if it is identified in other management plans.
2. Describe the extent to which the proposed project uses innovative concepts to achieve pollution reduction.
3. Demonstrated experience installing the proposed BMP or series of BMPs.
4. Anticipated quantifiable pollution reduction from the BMP(s) once installed, over the lifetime of the BMP.
5. If the project includes partner participation, please describe a plan for how the applicant will obtain permits and receive support from necessary partners.

Category B projects:

1. Demonstrated need for the watershed, municipality, or geographic area targeted by the project.
2. Describe the extent to which the proposed project design uses innovative concepts to achieve pollution reduction.
3. Ability of the applicant or team to develop an engineered design for the project, or to develop a prioritized implementation plan for the area of interest.

BOTH CATEGORIES:

- Demonstrated technical knowledge by the applicant of pollution issues in the Lake Champlain region.
- Technical merit and applicability of the proposed product toward the priority objectives identified in this RFP.
- Demonstrated ability to accomplish the deliverables outlined in Section II.
- Clarity, conciseness and adherence to the proposal guidelines.
- Demonstrated ability to create documents and user-friendly products that are accessible to and can be used by local partners working to improve pollution reduction management in the Lake Champlain Basin.
- Appropriateness of budget and budget justification, describing how the funds awarded will be used to produce the set of deliverables described in Section II.

VI. Available Funds and Match Requirements
A total of $490,000 may be made available across both categories. Distribution of funds to each category will depend on the quality of proposals submitted in response to each category. The Lake Champlain Steering Committee will ultimately decide the final distribution of funds across the two categories. Proposals with budgets that exceed the maximum amount identified for the category in which they were submitted will not be considered. Applicants may budget costs that are associated with the project as direct expenses, including personnel costs, travel, project supplies, meeting expenses, and subcontracts. Some allocation of project funds for indirect costs also is acceptable. However, for projects in response to this RFP, the indirect budget must not exceed 21% of the direct project budget. No in-kind or cash match is required, though match will be considered favorably during budget review.

VII. Appropriate Use of Funds

1) LCBP grant funds cannot be used to produce for-profit products or to cover costs associated with regulatory compliance or direct fundraising efforts. LCBP grant funds also cannot be used for land purchases, endowment funds, or lobbying or legislative advocacy of any kind.

**New in 2016**:  
2) Grant applicants are now required to follow the small purchase method which is a relatively simple and informal method (procurement procedure) for purchasing supplies, equipment, and services that cost more than $3,500 and less than $150,000. This procurement procedure is applicable to proposals submitted in response to this RFP if the primary applicant is not a for-profit organization. The purpose is to ensure fair and open competition for purchases supported by LCBP/federal funding. If the applicant plans to use LCBP funding to obtain supplies, equipment or contractual services to complete its proposed workplan, then it must follow federal procurement regulations:

- procurement of supplies and services that do not exceed $3500 may be made without soliciting competitive quotes if the price is considered reasonable.
- procurement of supplies, equipment and services that are greater than $3500 and do not cost more than $150,000 require that the recipient obtain multiple price quotes through a documented competitive process. Good faith efforts to obtain services from disadvantaged business enterprises should also be made, including contacting the small business administration and minority business development agency to inform them about the opportunity for businesses to submit price quotes as part of the competitive process. At least three price quotes for the contract work must be secured. The selected item or service does not need to be the lowest cost if it does not meet your requirements or you can otherwise demonstrate that the higher price offers the “best value.” Justification must be provided for the outcome of the bid process. This process may take place prior to the submission of a proposal for LCBP funds. For further information, see the small purchase method described here: [http://www.lcbp.org/about-us/grants-rfps/grant-toolkit/](http://www.lcbp.org/about-us/grants-rfps/grant-toolkit/)
3) Grant award funding may not be used for the purchase of food.

About Direct and Indirect Costs:
The LCBP encourages groups to budget costs that are associated with the project as direct expenses, including personnel costs, travel, project supplies, mailings, phone costs, office supplies, etc. However, use of some grant funds for indirect costs also is allowable, subject to both the provisions of OMB Circular A-87 and LCBP approval. If you need further guidance, contact the LCBP or look refer to http://www.whitehouse.gov/omb/circulars_a087_2004. Sections D, E, and F of Attachment A provide a nice overview of direct and indirect costs. For projects in response to this RFP, the indirect budget should not exceed 21% of the direct project budget, and indirect offered as match should similarly not exceed 21% of direct match contributed. The LCBP Indirect Policy can be found here: http://www.lcbp.org/wp-content/uploads/2012/09/2010-Indirect-Cost-Policy.pdf.

VIII. Notification of Award
Award notification to applicants is expected in late February 2017. The award recipient may be asked to submit a revised workplan, timeline, and task-based budget at this time. Project work cannot begin until a contract is signed by both parties. LCPB and NEIWPCC will not pay for expenses incurred prior to the contract start date. Payment for costs incurred will be on a reimbursement basis per the contract payment schedule and contingent upon completion of quarterly progress reports and project deliverables.

IX. Period of Performance
Work is expected to begin shortly after May, 2017 and is to be completed no later than March 30, 2018 (see specific deliverable deadlines in Section II above).

X. Schedule and Requirements for Proposal Submission
1. Please follow the format outlined in the attached Technical Proposal Format Requirements.

2. Hardcopies of the proposal will NOT be accepted. Editable electronic copies ONLY will be accepted and must be received via email in Microsoft Word or Word-compatible format by 4:30pm EST on January 5th, 2017 to grants@lcbp.org. Please include “Enhanced Grant Proposal” and include the Category (A or B) in your subject header.
XI. Contact Information

Direct all proposals and other inquiries to:
Kathy Jarvis
NEIWPCC Administrative Assistant
Lake Champlain Basin Program Technical Coordinator
54 West Shore Rd., Grand Isle, VT 05458
p: 802-372-3213; f: 802-372-3233
kjarvis@lcbp.org; www.neiwpcc.org; www.lcbp.org

Technical Proposal Format Requirements

Proposals should adhere to the following format and should not exceed a 10 page maximum length (font size 12), NOT including budget information, references cited and investigator resumes.

TITLE: - Concise and descriptive.

POINT OF CONTACT: Name, position, organization, address, telephone, fax and email of the person who will be the point of contact.

AUTHORIZED REPRESENTATIVE: Name, position, organization address, telephone, fax and email of the person who is authorized to sign the contract.

TRACKING INFORMATION: Federal Tax Identification Number, DUNS Number, and Certified Disadvantaged Business Enterprise (DBE): (Yes or No)

ABSTRACT: Brief description of proposed work.

INTRODUCTION: Overview of what the project is and what it will accomplish in relation to the RFP.

OBJECTIVES AND TASKS: List the project's objectives and describe in detail the tasks that will be performed relative to each objective, including methods and approaches.

DELIVERABLES: Detailed description of the planned products from each task of the project. Quarterly progress reports and a final report are required deliverables.

SCHEDULE: Timeline showing anticipated dates for completion of the major tasks and deliverables. Quarterly progress reports are due on the last day of December, March, June, and September. Work is to be completed within the specified performance period in the RFP.

DETAILED BUDGET JUSTIFICATION: Cost breakdown by major budget categories (i.e. personnel, equipment), linking costs to specific tasks/deliverables wherever possible, as seen in the example budget below. Breakdown should show costs to be covered by the LCBP award and other sources (if applicable), as well as any match amounts and totals. (1 page, not included in the 10 page maximum total for the proposal). See example provided below. Task-based budget templates are available on the LCBP website: http://www.lcbp.org/about-us/grants-rfps/grant-toolkit/
